**Delightful Weaverville Homestead offers 17.20 acres to develop & expand or enjoy privacy & simplicity. This cozy 1926 house features a renovated kitchen, open floor plan, wood stove, spacious laundry room/pantry, updated bathroom with radiant floor heat, tankless water heater, and new Andersen Windows. The home has maintained charm with the original bead-board and hardwood floors throughout. Freshly painted interior and exterior, as well as updated electrical. The expansive back deck is perfect for stargazing and wired for a hot tub. There are 3 outbuildings, 2 have electricity. Gardeners will delight in the 40x40 fenced vegetable garden, established nectarine, apple & fig trees, blueberry bushes, and grapevines! Given that the land does not have steep slopes or ridge restrictions, it has the potential for many building sites - two entrances to the property from Jupiter Rd and an old logging road running through creates trails to explore & dream about all the land could be!**
